

Lithium - Mining & Investment Strategy

Lithium-ion batteries are great for powering rechargeable electronics because they can store a lot of energy and have long lifespans. Research has found ways at improving battery technology, looking to increase capacity, speed up charging, enhance endurance, boost safety, and yes, upgrade the performance in very cold temperatures.

We welcome Dr Ajayi, CEO of Life Light Energy, a British company that specialises in finding and developing minerals and mining investment opportunities across the globe. We shall discuss why and how the future is lithium.

Date **August 14, 2022**

Time **4.00 pm -5.30 pm
London Time**

Venue **Zoom Meeting**
